Exploratory study-level effects after standard DICOM rendering

Intensity Kurtosis
Glcm Energy
Intensity Skew
Glcm Homogeneity
Breast Perimeter Normalized
Breast Extent
Breast Solidity
Lbp Uniformity
Intensity Mean
Breast Area Mm2
Breast Area Fraction
Lbp Entropy
Glcm Contrast
Gradient Q95
Glcm Dissimilarity
Gradient Mean
Glcm Correlation
Intensity Std
Breast Axis Ratio
Intensity Iqr
Intensity Entropy
Breast Eccentricity

BH-FDR q < 0.05
BH-FDR q ≥ 0.05
